- Control multiple lights/devices with one button

What's in the box

- 3x Compact wireless socket switch
- Remote control with battery included (CR2032)
- Manual

System requirements

- Indoor power socket

A wireless solution

This Compact Wireless Socket Switch Set APC3-2300R will make your life easier. It consists of three socket switches and a remote control. Place the socket switches in an existing power socket and plug in your lighting or other devices. With the included remote control, you are able to turn the devices on or off remotely. Why turn on and off every light in the house manually when you can do it from the comfort of your couch with just one push of a button. With the remote control, you control (multiple) lights and devices connected to ACC-2300 sockets; you now literally have the power in your hands. Do not waste valuable time or energy on operating your lighting, especially with limited mobility. These socket switches work with all devices up to 2.300 watt.

Remote control

With the remote control, you can control up to 3 lights or devices independently or control multiple devices with just one button. And you don't have to worry about empty batteries with the long battery life. Connect, sit back and enjoy!

Compact design

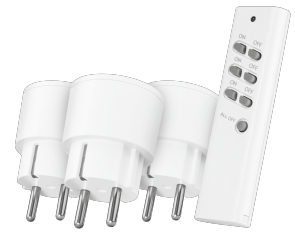

Because of the compact design of the socket switch, it can be placed in any indoor power socket and doesn't block any other neighbouring sockets. This means you are always able to use multiple socket switches next to each other. Furthermore, it offers child protection shutters so you can use them safely throughout your home.
