[Find more details in our online catalogue.](#)

Advanced Control

SAVE TOUCH allows you to change airflow and temperature setpoints, configure and adjust control functions and configure additional devices.

Capacitive display

A TFT-based touch display provides high contrast, great visibility angles and clear visibility.

Easy Set-Up

A start-up wizard facilitates a quick and seamless unit configuration.

SAVE TOUCH is an advanced control panel with a touch display for end customers and installers. It has a range of intuitive, advanced features to enable easier control and an active functions tab provides information about current unit activity. The SAVE TOUCH allows you to change airflow and temperature setpoints, configure and adjust control functions and configure additional devices.

A Sleep Mode switches the display the Quick Info screen when the display is unused and provides only the most relative unit information. TFT-based touch display provides high contrast, great visibility angles and clear visibility. A start-up wizard facilitates a quick and seamless unit configuration.

SAVE TOUCH comes complete with 2 pcs of screws for wall mounting position and 4 pcs of magnets for mounting on the unit.
